-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Information Disclosure Statement*

1. The information disclosure statement has been received and considered.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sugiyama '474 in view of McGowan and Chen.

Regarding claim 1 Sugiyama discloses in figures 3-6 and 10 a shock absorbing system for a crutch, but lacks showing using a gel between a fixed stop and plug as shown.

The reference to Chen discloses a gel composition that can be used in with shock absorbing application, including in crutches. Please refer to the abstract.

It is known that one shock absorbing element may be substituted for another. Such a substitution may be rubber for coil springs and vice-versa. Such a teaching is shown by McGowan. Note also the similarity in structure of this crutch with that of Bader.

It would have been obvious to one of ordinary skill in the art at the time of the invention to have used a gel composition as taught by Chen for the absorbing system at 8 of Sugiyama simply dependent upon the level of comfort for the user of the crutch.

Regarding claims 2 and 3 these requirements are fairly suggested by the combined teachings of the references above. Note the spring pin and slot at 3b,4b in figure 6.

### ***Conclusion***

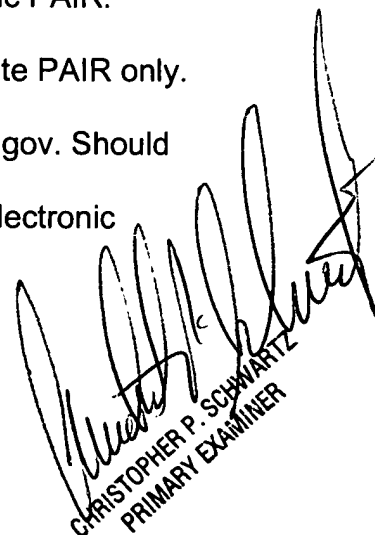

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited have been cited for showing similar concepts.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P. Schwartz whose telephone number is 571-272-7123. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chuck Marmor can be reached on 571-272-7095. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
